Authentic Finnish Sauna Wood Since 1948

Pieksäwood is a Finnish family-owned manufacturer of premium wood products for saunas, spas and interiors. For over 75 years, we have combined generations of wood expertise with modern manufacturing in Pieksämäki, Finland.

At the heart of our collection is aspen, complemented by black alder and radiata pine. We are the only Finnish sauna wood manufacturer with the entire production chain in-house – from our own aspen sawmill and thermal treatment to modern moulding. This gives us control over quality throughout the process, from raw Finnish aspen to finished panels, bench boards and mouldings.

Together with Finnish designers, we turn our wood expertise and carefully selected materials into distinctive products for contemporary sauna and wellness interiors – combining authentic wood, thoughtful design and uncompromising quality.

Introduction

Nature is close to our hearts.

Finnish nature is at the heart of our design. The silence of the forest, the rhythm of tree rings and the changing northern landscape inspire the shapes, surfaces and details of our collections.

We want to bring some of that feeling indoors – warmth, authenticity and the natural beauty of wood. To us, a panel is more than a material: it becomes part of the atmosphere and character of a space.
We hope this collection inspires you to create sauna and wellness interiors where Finnish wood, nature and thoughtful design come together.

Thank you for sharing our love of wood and Finnish design.

Sami Koskinen
CEO & Owner

Kare Panel

KARE Panel | Interior design by Paulliina Kanninen | Photo by Joonas Nieminen

Kare Panel

Emilia Karenina ╳ Pieksäwood

KARE Panel was created in collaboration with Finnish designer Emilia Karenina. Inspired by the gentle movement of waves, its soft, flowing lines bring a calm, natural rhythm to the surface.

Designed for sauna and interior walls and ceilings, KARE combines the warmth of wood with a distinctive sculptural profile. The continuous wave-like form can be used across larger surfaces or as a refined detail alongside other panels.

> “
>
> **Kare is the whisper of waves in the summer breeze.**
>
> - Emilia Karenina, Designer

Tunturi Panel

Tunturi Panel | Photo by Miia Saarinen

“ Tunturi ”

is a gentle, rounded mountain rising in the far north, shaped by time and nature. It carries the quiet beauty of the Arctic, a symbol of Finland’s wild and serene landscapes.

Tunturi Panel

Inspired by the fells of Finnish Lapland, the TUNTURI design panel plays with light and shadow, creating a harmonious, three-dimensional surface. Manufactured in Finland, its appearance subtly changes with the viewing angle.

TUNTURI brings structure and character to saunas, bathrooms and other interior spaces. It is available in aspen, heat-treated aspen and black alder.

SOLA Panel | Photo by Miia Juntunen

Sola Panel

“ Sola ”

is where mountains part, offering a serene path through rugged heights. It has long been a place of crossing, uniting lands and hearts.

SOLA Panel

Inspired by the rugged ridges and valleys of Lapland, the SOLA Panel brings rhythm, form and natural elegance to the interior.

The narrow grooves in the panel create a three-dimensional surface where light and shadow dance in constant motion. Each panel brings with it a subtle repetition that calms and gives rhythm to the space.

1-Groove Panel | Photo by Heikki Salmi

1-Groove Panel

“

“ Experience Finnish nature in our wood products, as we know it.

- Juha Koivu, COO & Partner

1-Groove Panel

The 1-Groove Panel creates a calm, refined surface through its clean profile, subtle rhythm and natural wood grain. Its understated design works beautifully on sauna walls and ceilings as well as in other interior applications.

Groove panels bring a peaceful rhythm to the space, reflecting the quiet power of the Finnish forest – and roots that reach deep into the northern soil.

2-Groove Panel

2-Groove Panel | Photo by Tuija Jaatinen

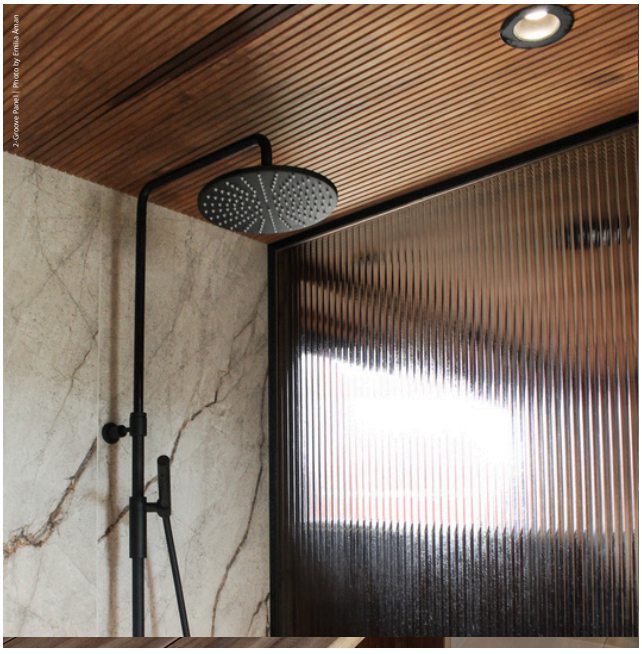

2-Groove Panel

The 2-Groove Panel creates a stronger rhythm and greater visual depth through two precisely defined grooves. Light and shadow emphasise the profile, giving walls and ceilings a distinctive architectural character.

Available in two widths – 15 × 90 mm for a bolder expression and 15 × 68 mm for a finer rhythm – the profile is designed for contemporary sauna and interior applications.

Lumo Collection

Lumo Collection | Photo by Anna Brandt

Lumo Collection

Minna Haapakoski X Pieksäwood

LUMO Collection is an illuminated slatted panel system designed by Finnish designer Minna Haapakoski for Pieksäwood. The integrated lighting becomes a seamless part of the panelling, creating soft, indirect light without separate enclosures or recesses.

Three complementary profiles – LUMO In, LUMO Out and LUMO Base – can be freely combined to create different patterns and lighting effects. Designed for both walls and ceilings, the system brings together distinctive design, flexible installation and integrated lighting.

> **Lumo brings the timeless rhythm of traditional Finnish wooden houses together with the softness of indirect light.**
>
> - Minna Haapakoski, Designer

Aspen

Black Alder

A palette for sauna design

Wood defines the look, feel and atmosphere of a sauna. From the pale, refined character of aspen to the warmer tones of black alder and heat-treated radiata pine, each wood brings its own expression to the space.

Natural and heat-treated variations expand the palette further, offering a wide spectrum of tones for contemporary sauna design.

> “As sauna becomes an integral part of modern wellness, natural materials, thoughtful design and atmosphere matter more than ever.
>
> – Kaisa Koskinen, CMO & Partner

Heat-Treated Radiata Pine

Aspen at the heart of our collection

One wood. Distinctive expressions.

Aspen is at the heart of our collection. Its soft touch, low thermal conductivity and refined appearance make it an exceptional material for sauna interiors.

From natural and heat-treated aspen to our distinctive Sávu and Roots Collections, different treatments and selections reveal entirely different expressions of the same wood.

A natural choice for sauna

LIGHT & TIMELESS
Its naturally pale tone creates a clean, calm atmosphere.

COMFORTABLE TO TOUCH
Low thermal conductivity makes aspen particularly well suited to sauna interiors and benches.

KNOT-FREE & RESIN-FREE
Selected high-grade aspen provides a smooth, refined surface.

VERSATILE BY DESIGN
From panels and design profiles to bench boards and mouldings.

Our signature sauna wood

Aspen has been at the heart of Pieksäwood's sauna wood expertise for generations. Today, we work with carefully selected aspen from Finland and the Baltic region, manufacturing panels, bench boards, mouldings and design products in Pieksämäki, Finland.

From aspen to sauna wood

Our own sawmill, thermal treatment and moulding give us control over the process from raw material to finished product.

Photo by Anna Ruotanen

Heat-Treated Aspen

Warm in tone. Enhanced by heat.

Enhanced by heat

WARM & NATURAL

Thermal modification gives aspen its characteristic warm brown tone while preserving the natural beauty of the wood.

IMPROVED STABILITY

Thermal modification reduces the wood's tendency to react to changes in moisture.

LOWER MOISTURE ABSORPTION

The treatment reduces moisture uptake, an important benefit in sauna environments.

CHEMICAL-FREE PROCESS

The wood is modified using only heat and water vapour – without added chemicals.

Made for heat. Made for sauna.

Thermal modification enhances aspen for demanding sauna environments while creating its distinctive warm brown tone.

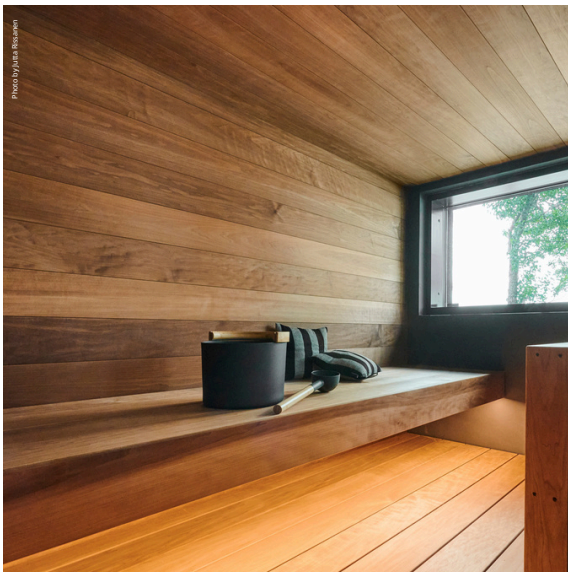

At Pieksäwood, we thermally modify aspen at our own facility in Pieksämäki, Finland. Controlling the treatment in-house gives us control over the process and the quality of the finished material – from carefully selected wood to sauna-ready products.

Heat. Steam. Wood.

Heat + Water Vapour

No added chemicals.

Warm tone · Improved stability · Reduced moisture absorption

Sávu Collection

Transformed by heat.

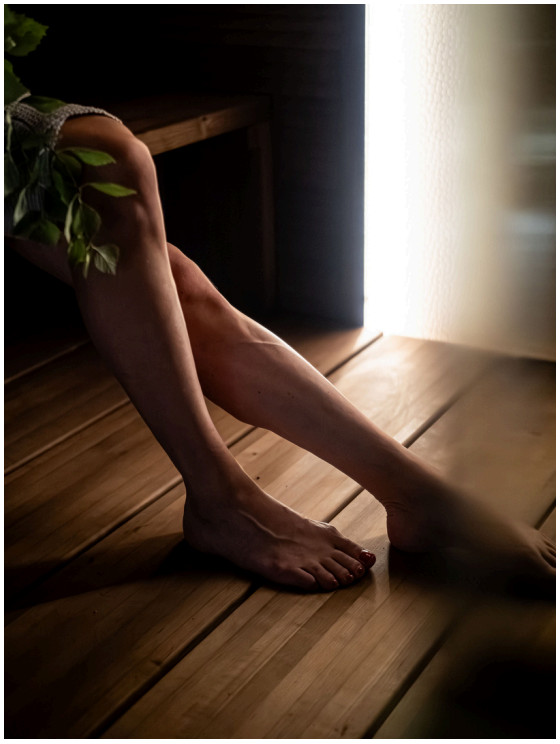

Sávu Collection| Photos by Emma Jämsén

Sávu Collection

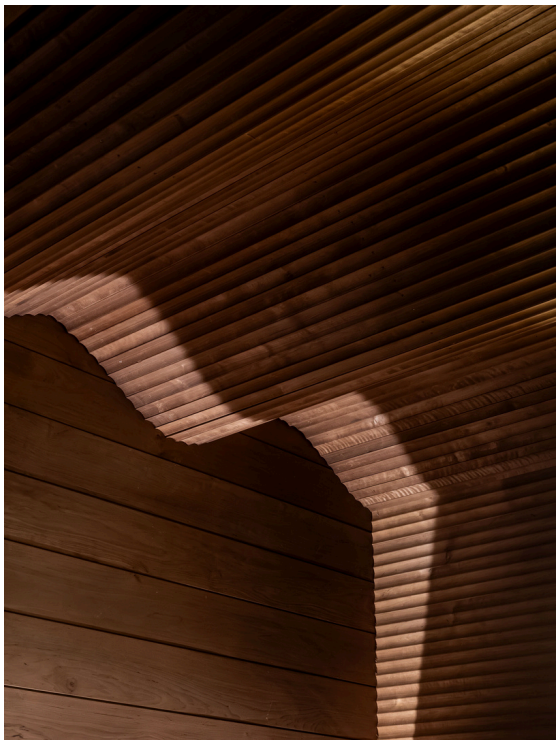

Sávu is our distinctive dark expression of heat-treated wood. Its deep brown tone is created using only heat and water vapour, bringing depth and warmth to contemporary sauna and wellness interiors.

Designed for those looking for a darker, more expressive wood surface, Sávu combines the benefits of thermal modification with a rich, sophisticated appearance.

Heat-treated and manufactured at our own facilities in Pieksämäki, Finland.

Roots Collection | Photo by Visa Tulisalo

Roots Collection

Character left visible.

> **With Roots, we turn a previously underutilised part of the tree into something worth showing.**
>
> - Arttu Niemi, Production & Development Director

Roots Collection

The Roots Collection takes you to the heart of the Finnish forest, where the natural knots and grain of aspen become part of the design. Each piece is unique, bringing authentic character and warmth to sauna and interior spaces.

Roots was created to make better use of our Finnish aspen. By turning knotty, previously underutilised side streams from our own sawmill into distinctive products, we give more of every tree a purpose. The collection includes panels and interior elements in natural aspen, heat-treated aspen and our darker Sávu finish.

Wood for the complete sauna

Panels

For walls & ceilings

From timeless STP and STS profiles to distinctive design panels, our collection offers solutions for different sauna styles and architectural expressions.

Bench Boards

From narrow to extra-wide

A wide range of bench board dimensions for seats, backrests, frames and details – including extra-wide laminated options.

KANTO Bench Elements

Ready for installation

Ready-made KANTO bench elements offer a practical way to create clean, consistent sauna interiors with less work on site.
